YOU AND 3M – EXPERTS EVERY STEP OF THE WAY

Now you too can use products from 3M!

3M

Easy steps to perfect paintwork

3M products are trusted by the professionals. Now you can restore and protect that showroom finish with the range of 3M Car Care products.

From a quick clean with 3M™ Car Wash Soap through to the ultimate treatment of 3M™ Performance Finish, each of our products does a superbly professional job. But they can of course be used independently to suit your needs and the time available.

1

3M™ Car Wash Soap

A concentrated formula producing long lasting, natural suds and a pleasant cherry aroma. Tough on dirt and grime yet gentle on paintwork and wax finishes.

2

3M™ Scratch Remover

The easy way to remove fine scratches, using professional repair technology to restore the showroom shine.

3

3M™ Performance Finish

For the ultimate long-lasting, high gloss finish, with synthetic polymers providing maximum paint protection.

4

3M™ Quick Wax

Treat your car to a professional high gloss finish in a matter of minutes with the bonus of Carnauba wax protection.

5

3M™ Microfiber Detail Cloth

The super-soft, non-linting microtexture is ideal for all surfaces. Easily removes wax and polish residue and fingermarks.

Wheels & Tyres

3M™ Wheel & Tyre Cleaner

Remove brake dust, tar, grease and grime in one easy step; cleaning sidewall scuffs and giving wheels a brilliant shine.

3M™ Tyre Restorer

The perfect finishing touch to your car care regime, 3M Tyre Restorer brings back a natural, long lasting shine.

Glass

3M™ Glass Cleaner

For a sparkling finish, 3M Glass Cleaner features a non-drip foaming action that clings to vertical surfaces to create a genuinely streak-free shine.

Safe to use on tinted windows, it delivers the ultimate shine to glass.

Interior

3M™ Leather & Vinyl Restorer

Treat your car's interior. Removes dirt and grime from leather, vinyl, rubber and plastic without leaving a residue. Restore a natural satin finish, condition and protect in one simple step.

Q&A

Q. Can 3M™ Car Wash Soap (shampoo) be used on already waxed cars?

A. Yes, absolutely. It will safely remove dirt and grime without removing your wax finish.

Q. Does 3M™ Performance Finish have any abrasive in it?

A. No, it is a wax with no abrasives, so will not remove scratches. It has a high performance polymer that bonds to the surface to provide maximum protection. 3M™ Scratch Remover is needed to take out scratches.

Q. What kind of scratches will 3M™ Scratch Remover remove?

A. Generally, the kind you get from regular car washing. If you can feel the scratch with a fingernail, it may need to be professionally polished out.

Q. What's the difference between 3M™ Performance Finish and 3M™ Quick Wax?

A. 3M Performance Finish is a long lasting synthetic wax that should provide a glossy finish even after regular washing. 3M Quick Wax can be used in between applications of 3M Performance Finish when a quick shine is needed. It can also be applied onto wet surfaces.

3M - products the professionals prefer

Q. What is beading? Why is it good?

A. Beading is when water forms defined beads on the paint's surface rather than 'sticking' to it. It means it is easily dispersed and less likely to form water marks.

Q. Will the 3M process restore my car's colour?

A. If your car has fine car wash scratches or light oxidation that makes it look dull, using the correct process of 3M™ Car Wash Soap, 3M™ Scratch Remover and 3M™ Performance Finish with a 3M™ Microfiber Detail Cloth will restore the clearcoat to a glossy, scratch-free finish.

Q. What if I have damage from bird droppings or acid rain?

A. Light oxidation and damage may be removed with 3M™ Scratch Remover but if you can feel damage in the clearcoat with a fingernail, it may need professional repair.

Q. Why do I need to use a microfibre cloth?

A. 3M™ Microfiber Detail Cloth is the safest way to remove wax residues and buff the surface to a glossy finish without scratching the surface. Other cloths may remove residue but could put scratches back into your freshly restored paintwork.

Q. What's the difference between 3M's consumer and professional products?

A: Our professional products are designed for paint and body shop professionals, using high speed rotary polishing machines. The product development has enabled the consumer range to be modified for application by hand or with an orbital buffer.

Q. Is the product range suitable for use on motorbikes*?

A. Yes – use any of the products exactly as described for a perfect finish on bikes, boats, vans etc.

***Please note -**
Specific care should always be taken when using any Car Care products on the tyres, brakes and seats of two wheeled vehicles.
